

## Anti-C9 Tag Rabbit Polyclonal Antibody

CATALOG NUMBER: RA-C09-0100, 100 µg

<b>Introduction</b>	Epitope tags are short peptide sequences which are chosen because high-affinity antibodies can be reliably produced in many different species. A C9 peptide (TETSQVAPA) is derived from c-terminal 9 amino acid sequence of rhodopsin. Other names used: rho1D4 tag, rhodopsin epitope tag.
<b>Applications</b>	Western blot, ELISA, maybe used for other applications.
<b>Description</b>	Rabbit anti-C9 tag polyclonal antibody
<b>Immunogen</b>	Immunized with a conjugated C9 peptide (TETSQVAPA)
<b>Specificity</b>	Reacts with proteins which contain C9 sequence
<b>Purification</b>	Protein A immunoaffinity chromatography.
<b>Isotype</b>	Rabbit IgG
<b>Storage</b>	4 °C for short term (for long-term storage, keep at -20°C or -70°C). Non-hazardous.
<b>Concentration</b>	2 µg/µl in PBS
